How to use this guide

These are the design visualizations we created for Turtle Nest — the backyard, patio and interiors shown at the styling level we're aiming for. This guide puts all of them in one place and, beside each one, lists the pieces you can actually see in the image.

The lists are written generically — a category and a short description, not specific brands — so you can lay this next to the shopping list already sent and tick off items as they match.

1

Walk the images

Go zone by zone: curb appeal, pool & yard, covered patio, outdoor kitchen, then the interiors.

2

Match the list

Each “Products to match” line points to one thing in the picture. Find its twin on the shopping list.

3

Flag the gaps

Anything shown here that isn't on the list yet is a quick add before we shoot the final photos.

A note on the images: these are AI-assisted design renderings of the real spaces, made to preview the finished styling. They're a guide to the look and the type of item — colors, materials and exact models can vary with what's available when you buy.

Front Exterior & Evening Lighting

The first thing every guest sees — a warm, lit-up arrival at dusk.

PRODUCTS TO MATCH

- ☐ Landscape lighting kit — path lights plus tree / trunk uplights
- ☐ Decorative river-rock / stone beds along the walkway
- ☐ Brick paver front walkway
- ☐ Low foundation hedge plantings
- ☐ Potted bird-of-paradise (or similar tropical accent)
